1. INTRODUCTION

This is an engineered platform developed by Fridolin Mpiza, Tanzania Network and Software Engineer through which a system user can stream the online radio stations of different areas where the radio programs on those stations can be easily played.

A system also enables user to search for a specific radio stations from a certain city, country and category.

2. TECHNOLOGIES USED

A system was developed by using the following technologies to make sure that functionalities tend to operate effectively;

- Cryptographic Algorithms,
- Application Programming Interface (API)
- Security hashes
- JavaScripts (Js) and Cascading Style Sheet (CSS)
- HTML (Hyper Text Mark Up Language)
- Mysql Database

All of these technologies were used to make sure that the whole system is going to undertake the intended functionalities while it is used.

3. PRODUCT FEATURES

3.1 System Dashboard

- A system is a very user friendly since a system user can easily deal with several functionalities in a scalable and effective ways of implementation.
- Therefore, a system consists of radio station searching box, regions/ cities and playing buttons from the radio stations list that a user needs to listen. It appears as follow

Welcome to Fridolin's Online Radio Access

Search by station Search

- Arusha
 - Moshi
 - Dar es Salaam
 - Musoma
 - Dodoma
 - Mwanza
 - Mbeya
 - Ngara
 - Morogoro
- Show more stations ▾ All cities ▾

 **Clouds FM** 
adult contemporary
49 287

 **Tzgospel Radio** 
news • christian • gospel
KBS Films Tz - KUTEMBE...

4. SOLUTION ONLINE

Eng. Fridolin, will build software by using an advanced technologies in corresponding to the current global development of science and technology as well as by ensuring the high level of security and scalability. Also, it will allow you to do any updates on page content and images once it is launched and it make an easy integration with analytics software to track page and site performance.

5. EXECUTION TIMELINE

- System execution timeline including several task as follow till making sure that the system is complete to operate.
 - Initial Design as per discussion to meet client's needs.
 - Functional Prototype
 - Application development and Complete Testing

6. PROJECT COSTS

Task	Price (USD)	Price (Tsh)
Initial Invoice	85 / =	200,000/=
Approved Design Invoice	128/ =	300,000/=
Final Invoice	128/ =	300,000/=
TOTAL AMOUNT	300 USD /=	800,000/=
